1 Game Creation: Step-by-step instructions on creating and publishing Games.

The platform allows users to create their own content using easy to follow guided screens and ready to use templates.

To create a new Game and share it with your students you must:

1. **Access the Editor**:

   o Log in to your account.

   o Navigate to the **My Custom Games** page and select **Create a new game**.

2. **Choose a Content Type**:

   o From the editor interface, browse the list of available content types, such as quizzes, interactive videos, Game maps or drag-and-drop activities.

   o Click on the desired type to begin.

3. **Customize Your Content**:

   o Use the editor tools to input text, upload media, and configure settings for your activity.

   o Preview your work to ensure it meets your expectations.

4. **Save and Publish**:

   o   Once satisfied, create your content.

Once created the content will appear in the **My Custom Games** page and a public page will be automatically assigned to it.

5. **Manage Your Content**:

   o Access your saved Games via the **My Custom Games** page.

   o Edit, delete or share existing content as needed.

   o You can check what users will see by clicking on the name of the Game

Close

Image 7 Game Step 3

4. Use the Game map tab to add stages on the image and create the mar route for the user.
   To add a new stage you drag the symbol on the map, in the position you want.

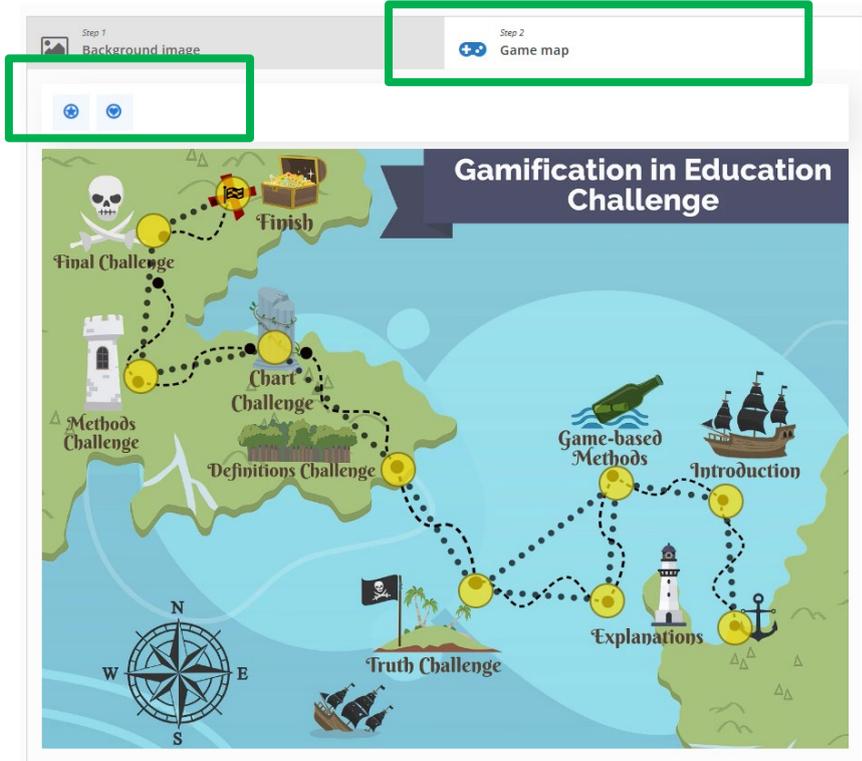

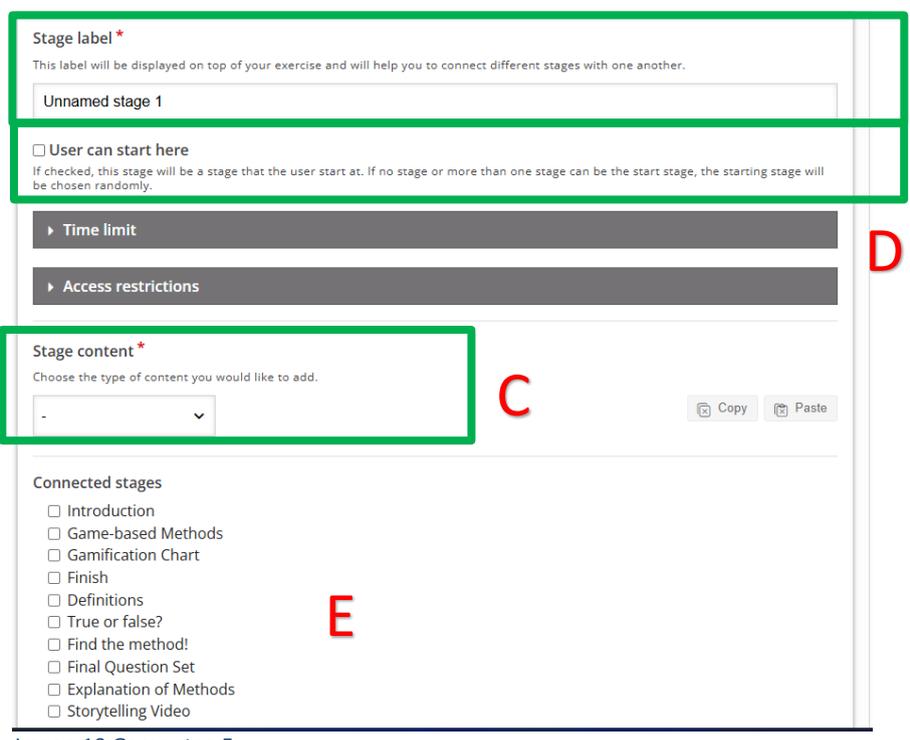

Image 8 Game step 4

Image 9 Game step 4

5. Edit the stage to add the needed data

    A. Label
    B. If it is a starting stage
    C. The content type
    D. Other limitations and properties
    E. The connecting stages to create the path

Image 10 Game step 5

6. Click on the Create button to finish the Game creation
